## EDITORIAL CONTRIBUTIONS

Pitture e Vernici-European Coatings, was born in 1924 as a support to chemical formulators, involved in the production process of coating products, construction chemicals, adhesives and sealants, printing inks and related products.

The magazine offers an overview on the use of the main raw materials for the formulation. Throughout these last 99 years the magazine has reached an international circulation of 6,500 copies, printed on paper and over 56,000 online copies distributed all over the world.

The Editorial Programme could be changed depending on new events or on the technical committee's decisions.
